

## Invitation for Bids (IFB)

# Government of Saint Lucia Supply of Photovoltaic Systems

The Government of Saint Lucia has announced its intention to reduce energy consumption in the public sector by 20% by the year 2020. To assist in this regard, funding has been received from the Republic of China (Taiwan) for the ***Sustainable Energy in Saint Lucia: From Concept to Action*** project to support energy efficiency in the public sector. A key component of this project is the installation of photovoltaic systems on suitable public buildings.

The Department of Sustainable Development invites sealed bids from eligible bidders for the procurement of **two (2) 25kWp** photovoltaic (PV) systems as part of a strategy to incorporate sustainable energy into the public sector. Bidding will be conducted through the National Competitive Bidding (NCB) procedures according to the Government of Saint Lucia's procurement rules. Details about all requirements for the hardware and services to be delivered can be obtained from the bidding documents.

Persons interested in bidding should register with the **Renewable Energy Division of the Department of Sustainable Development** by accessing the registration forms on the Government of Saint Lucia website [www.govt.lc](http://www.govt.lc) and emailing completed forms to [est@govt.lc](mailto:est@govt.lc) or delivering completed forms to the Renewable Energy Division, First Floor, Caribbean Cinemas.

Please note that the bidding documents will be provided upon registration as well as other necessary instructions for submitting bids.

For further information please contact the **Renewable Energy Division** at telephone number **451-8746** or email [est@govt.lc](mailto:est@govt.lc) .
